

PRODUCT INFORMATION

- rath's face protect prevents paint mist from sticking to the skin
- The paint and cream can be simply wiped off with a cloth after work

rath's face protect

Skin protection cream

Application range

Adhering varnish/paint, cold protection

rath's face protect prevents paint mist from sticking to the skin on the face. The paint and cream can be simply wiped off with a cloth.

The high level of grease in the cream makes it ideally suited as a cold protection cream and to care for dry facial skin.

Application and dosage

Always apply to clean, dry skin.

Apply the cream to the facial skin and gently rub in.

After work, wipe off the cream and the paint layer on it using a cloth.

Dosage: approx. 0.5 ml

ADVANTAGES

Also suitable as a cold protection cream and to care for dry skin on the face

- No silicone
- Discreetly perfumed
- Very good skin compatibility - dermatologically tested

face protect

Skin protection cream

Product advice

A skin-friendly combination high in lipids which is easily absorbed and distributed prevents the adhesion of paint mist on the skin.

rath's face protect cares for the skin and prevents chapped and cracked skin.

Proof of effectiveness

Realistic application tests have verified that the product makes it easier to wipe off paint mist.

Skin compatibility

Tested by: Dermatest GmbH – Research Institute For Reliable Results, Muenster.

Result: rath's face protect passed the dermatological inspections on humans conducted by specialist doctors with a "very good". No toxic-irritant incompatibility reactions occurred in the epidermal test according to international guidelines.
