

PRODUCT INFORMATION

- rath's multi protect protects the skin against
 - changing skin stresses, such as oil, grease and dust,
 - and against contact with moist dirt/water
- Can also be used under gloves
- Glycerin and valuable waxes combined with
 - renewable raw ingredients like jojoba oil
- Helps to maintain the skin's natural moisture levels

rath's multi protect

Skin protection lotion

Application range

Various skin stresses

rath's multi protect protects the skin during work with oil, grease, rust, dust, tar, silicone, moist dirt and during contact with water.

rath's multi protect can be used when wearing coated textile and leather gloves.

Application and dosage

Rubbing in

Before work, carefully massage a pea-sized amount (approx. 1 ml) onto the hands - especially around the fingernails and nail beds - and leave to dry.

At work

The dry, elastic and sturdy grip protective film forms an effective contact barrier between the skin and penetrating work substances.

Washing off

After work, wash the hands with the mildest suitable hand cleanser, then thoroughly rinse and dry them.

ADVANTAGES

Ideal for changing skin stresses

- Versatile use
- Very short drying time
- Water-resistant
- With glycerin and jojoba-based moisturiser
- No silicone
- Discreetly perfumed or unperfumed
- HACCP-evaluated (unperfumed version)
- pH-neutral (approx. pH 5)
- Facilitates cleansing of the hands
- Very good skin compatibility - dermatologically tested

multi protect

Skin protection lotion

Product advice

Skin protection products are subject to wear, which is heavily dependent on the working conditions. The duration of the protective effect of rath's multi protect lasts longest in the case of contact with oily, greasy or dusty dirt. The more your hands come into contact with water and any surfactants (cleaning agents) contained in it, the lesser the effect.

For work which mainly involves washing and cleaning solutions, we recommend rath's aqua protect skin protection lotion.

Proof of effectiveness

Verification of the efficacy against lipophilic as well as hydrophilic toxicants in the BUS skin protection test.

Tested by: Dr Pittermann in collaboration with the Institut für Pharmakologie, Toxikologie und Pharmazie der Tierärztlichen Hochschule (Institute for Pharmacology, Toxicology and Pharmacy of the Veterinary University, Hanover) (Prof. Dr M. Kietzmann).

Result: The effective protection performance of rath's multi protect was verified through single or multiple application of the model toxicants sodium dodecyl sulphate (SDS, 10% in water), n-octane and toluene.

Skin compatibility

Tested by: Dermatest GmbH – Research Institute For Reliable Results, Muenster.

Result: rath's multi protect passed the dermatological inspections on humans conducted by specialist doctors with a "very good". No toxic-irritant incompatibility reactions occurred in the epidermal test according to international guidelines.

Inhaltsstoffe/Ingredients (INCI)

Aqua, Alcohol Denat., Glycerin, Cetearyl Alcohol, Polyglyceryl-6 Distearate, Triacetylalcohol, PVP, Disodium Lauryl Sulphosuccinate, Sodium Coco-Sulphate, Triticum Vulgare Starch, Dicaprylyl Carbonate, Jojoba Esters, Lauryl PCA, Polyglyceryl-3 Beeswax, Hydrogenated Palm Glycerides, Cetyl Alcohol, Glyceryl Stearate, Xanthan Gum, Titanium Dioxide, Citric Acid, Sodium Benzoate, Potassium Sorbate, (Parfum*)
